

# Technical Brief 2016/09

---

## 1. China OMAR 2.4 Prohibitions and Restrictions (9)

Valentina Martinovic-Pavkovic (Verification Services) and Leone Basher (Market Access)

### Notification:

Since the publication of Technical Brief 2016/08 Market Access has clarified with AQSIQ that products produced from the 5 meat establishments (ME23, ME58, ME103, ME118 and ME168) between the date on the AQSIQ website (11 November 2016) and the date on the CNCA website (11 October 2016) will be able to be exported to China at commercial risk.

The products produced and stored from 11 October 2016 onwards can be certified to China, provided that all China OMAR requirements have been met and verified compliant.

### Background:

The clarification obtained from AQSIQ by Market Access team in Beijing was only verbal and it is highly unlikely that will be received in writing. For that reason the export can only be at the exporter's commercial risk.

Chris Mawson  
Agency Technical Manager (MPI Verification Services)
