## Overview of September 2025 exports

### September exports

It was another good month with overall exports worth \$713 million, 29% higher than last September, and there was an increase in the value of exports to the three major markets, with exports to the US up 25% to \$175 million, China up 26% to \$131 million, and the EU up 35% to \$116 million.

Sheepmeat export volumes were up 14% to 17,890 tonnes and the value increased 42% to \$252 million, which was a record value for September. This was partly due to growth in exports to the EU, with the volume up 11% to 3,327 tonnes and the value up 40% to \$75 million, but there was also an increase in exports to China (up 12% by volume to 6,484 tonnes and 38% by value to \$47 million) and to the US (up 14% by volume to 2,273 tonnes and 17% by value to \$42 million).

The volume of beef exports was down 4% from last September to 26,866 tonnes, but the value increased by 15% to \$286 million. There was a drop in exports to North America, with the US down 17% by volume to 6,615 tonnes and 6% by value to \$82 million and Canada down 24% by volume to 2,429 tonnes and 5% by value to \$26 million. However, this was offset by growth in exports to North Asia, with the volume and value of exports to China, Japan and Korea all up from last September, and by further growth in exports to the UK, where the volume was up 301% to 2,074 tonnes and the value up 457% to \$25 million.

Fifth quarter exports were worth \$174 million, which was 38% higher than last September. This was largely driven by growth in exports of blood products (up 150% to \$37 million) and tallow (up 162% to \$28 million).

### Third quarter exports

The increase in the value of exports in September helped to grow the value of overall exports for the third quarter to \$2.27 billion, 20% higher than the third quarter in 2024.

There was an increase in the value of exports to all the major markets for the quarter, with the US up 12% to \$628 million, China up 25% to \$451 million, the EU up 35% to \$339 million and the UK up 80% to \$174 million.

There was a small increase in the volume of sheepmeat exports for the quarter, up 2% to 59,249 tonnes, but the value increased 35% to \$808 million. The largest growth in value was to the EU (up 50% to \$235 million), but there was also growth in exports to China (up 27% to \$155 million), the US (19% to \$143 million) and the UK (up 24% to \$90 million).

The volume of beef exports for the quarter was down 5% to 90,171 tonnes, but the value increased 15% to \$994 million. The value of exports to the US was up 3% to \$369 million, China was up 27% to \$194 million and the UK was up 431% to \$73 million. The one major market where there was a drop in the value of exports was to Canada, down 2% to \$74 million.

For both beef and sheepmeat, while the overall export volumes were similar to 2024 Q3 there was good growth in chilled exports, with chilled sheepmeat up 9% by volume to 7,120 tonnes and 42% by value to \$171 million, and chilled beef up 21% by volume to 8,924 tonnes and 43% by value to \$182 million.

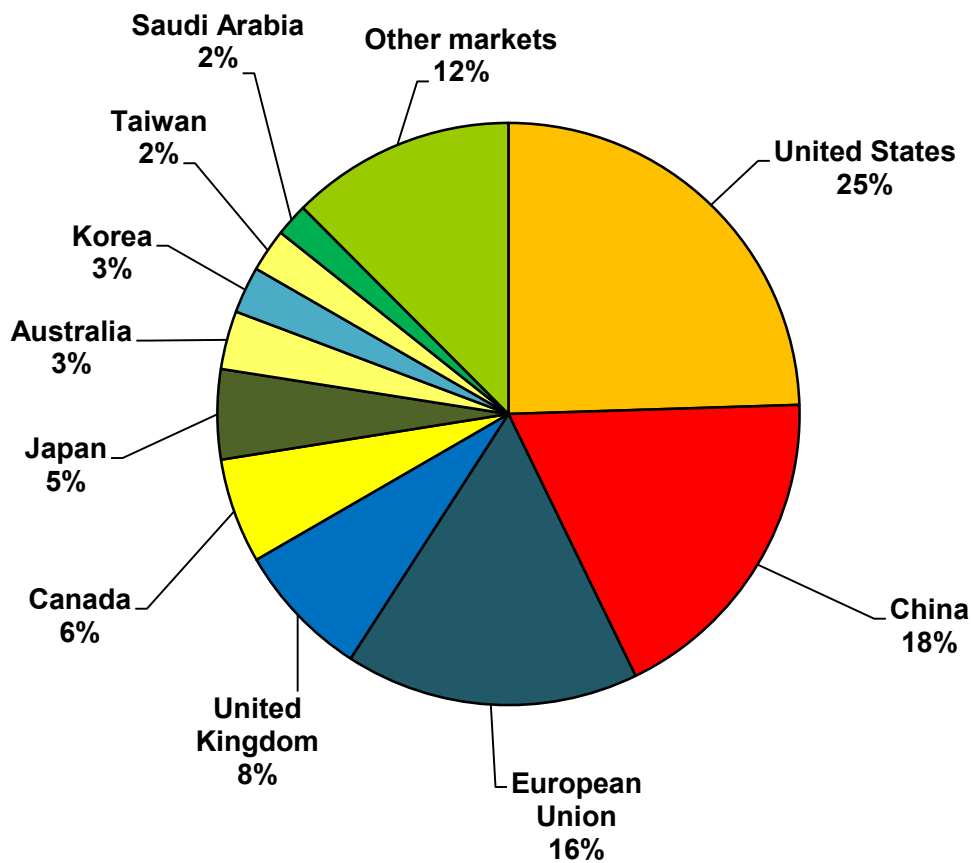

This contributed to average value of overall sheepmeat exports increasing from \$10.31/kg in 2024 Q3 to \$13.64 in 2025 Q3, and the average value of beef exports increasing from \$9.16/kg to \$11.02/kg in the same period.

Fifth quarter exports were worth \$467 million in the third quarter, up 8% from 2024 Q3. The largest categories were blood products and glands (up 441% to \$79 million), prepared meat products (up 8% to \$78 million) and casings and tripe (up 25% to \$72m).
