### Notes

Volume. Shipped weight  
Value. Free on Board (FOB) - the current market value of goods in the country of origin, including all costs necessary to get them on board the ship.

## Highlights for January 2022 exports

It was another positive month with overall exports worth \$940m, up 27% from January 2021.

The value of exports increased to nearly all the major markets, with China up 25% to \$398m, United States up 32% to \$195m, United Kingdom up 9% to \$41m and Japan up 76% to \$40m.

Beef was the standout for the month, with the volume up 7% to 42,291 tonnes, and the value up 51% to \$422m.

The three main beef markets were China (\$186m), United States (\$129m), and Japan (\$24m).

The strong demand meant that the average FoB value for overall beef exports during January was up to a record \$9.98/kg.

Sheepmeat was more mixed, with the volume down 14% to 31,449 tonnes.

However, prices are still strong and despite the drop in volume the value was up 12% to \$369m. Sheepmeat exports to China were down 7% to \$162m, but exports to the United States were up 78% to \$52m, and exports to the United Kingdom up 5% to \$36m.

There was, however, a significant drop in the volume of chilled exports,

There were 3,061 tonnes of chilled exports, which was 41% lower than last January, and there was a drop in chilled exports to the United Kingdom and all the major European markets.

There were only 452 tonnes of chilled sheepmeat exported to the United Kingdom in January which was the lowest level of exports for the month in more than 20 years.

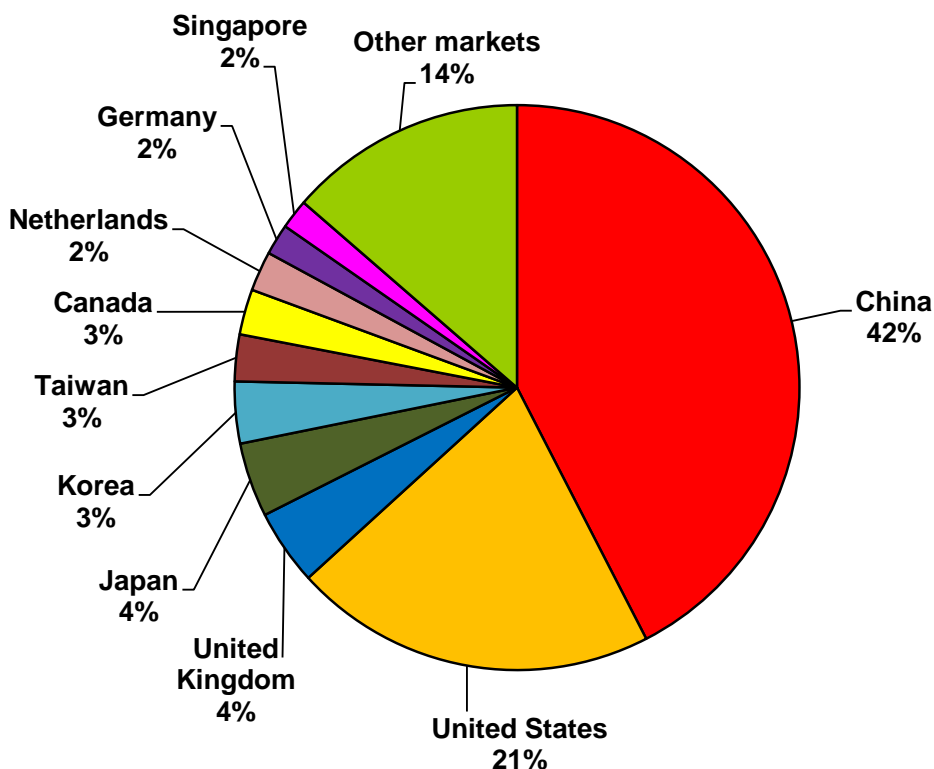

In January, chilled products normally make up about 40-50% of sheepmeat exports to the UK (by volume) but this year it was only 17%.

This indicates that supply chain disruptions are continuing to have an impact on chilled exports, with more product being sent frozen because of the risks in the disrupted supply chain (transit times, etc).

**Top 10 overall red meat and co-product markets by value, January 2022**
