Overview of March 2026 exports

Exports to the Middle East

To assess the impact of the conflict in the Middle East on red meat sector exports to the Gulf Cooperation Council (Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, and the United Arab Emirates) a new table has been included at the start of the report.

It provides a summary of exports to the GCC in March compared to March 2025 and compared to the average March exports from 2022-2025. Compared to last March, exports were down 72% by volume and value. Exports to the GCC last March were higher than normal (particularly for sheepmeat), but there was still a decrease of more than 60% by volume and value this March compared to the average for March exports from 2022-2025.

The monthly data is provisional when it is first released, and it is likely that there will be some revisions to this March data when the April data is released.

March exports

The value of overall exports was largely unchanged from last March, at \$1.24 billion.

The volume of sheepmeat exports was down 16% from last March to 39,211 tonnes, with lower exports to all the major markets apart from Canada and Japan. The volume of beef exports dropped 18% to 39,367 tonnes, with only two markets (the UK and Malaysia) recording an increase in volume from last March.

This was the lowest volume of sheepmeat exports in March since 2006 and the lowest volume of beef exports in March since 2018. This was due to favourable pasture conditions and farmers holding on to stock leading to lower meat production in the early part of the year. MPI data shows that sheepmeat production in January and February 2026 was 11% lower than the same period last year and beef production was down 16%.

Despite the drop in volume, higher average export values saw the overall value of sheepmeat exports increase by 5% to \$540 million and the value of beef exports only dropping 2% to \$509 million.

The top five markets were the same as last March. However, while the US was the largest market for the month the overall value of exports was down 15% from last March to \$334 million.

This was largely due to a 21% drop in the volume of sheepmeat exports and a 27% drop in the volume of beef exports compared to last March. While the average value of value of exports in March was significantly higher than a year ago (with sheepmeat up 13% to \$23.15/kg and beef up 20% to \$14.40/kg) the large decreases in volume saw the total value of sheepmeat and beef exports to the US drop by 11% and 12% respectively.

China remained the second largest market and the value of exports was unchanged from last March at \$274 million. The higher average value of exports compared to last March meant that while the volume of sheepmeat exports dropped 23% the value of exports only dropped 6% to \$130 million, and while the volume of beef exports dropped 7% the value increased 11% from last March to \$85 million.

First quarter exports

The exports for the first quarter followed a similar pattern to March, although the drop in export volumes were not as pronounced as in March as higher meat production in late 2025 saw a small increase in both sheemeat and beef export volumes in January.

Sheepmeat export volume dropped 7% compared the 2025 Q1 to 113,618 tonnes, but the value increased 14% to \$1.53 billion. The most significant growth in value of exports was to the EU, which were up 23% to \$464 million making it the largest market by value for the quarter.

Beef exports volume dropped 5% to 122,432 tonnes but the value increased 13% to \$1.56 billion for the quarter. The US was the largest market with exports of \$796 million, accounting for 51% of total beef exports by value for the quarter.

Exports to the Gulf Cooperation Council (GCC) in March 2026

| | | Exports in March 2026 | Change from exports in March 2025 | Change from average March exports 2022-2025 |
|-------------------|-----------------------|--------------------------|---|--|
| Chilled beef | Quantity (kgs) | 45,666 | -89% | -88% |
