	\$4,415 million	-9%
Fifth quarter exports	\$2,026 million	-8%

Overview of December 2023 exports

Overall exports in 2023

Overall export volumes were up from 2022 but the value of overall exports dropped from the record level in 2022, down 11% to \$10.2 billion.

China remains the largest market, but exports were down 16% to \$3.6 billion. Exports to Japan were down 31% to \$388 million, to the UK down 22% to \$361 million and to the Netherlands down 4% to \$347 million. The US bucked this trend, up 8% to \$2.5 billion, which was due to a large growth in beef exports compared to 2022.

Sheepmeat exports in 2023

The volume of sheepmeat exports was up 3%, to 384,239 tonnes. However, the value was down 14% from the record level of 2022, to \$3.7 billion. This drop reflected the impact of inflation and cost of living pressures in key markets, and also increased supply from Australia in 2023. After three years of good growing conditions and flock rebuilding, Australian exports increased by 25% to just over 535,000 tonnes for the year.

China continued to be NZ's largest sheepmeat market. While the volume was up 10% to 216,079, the value was down 10% to \$1.4 billion, as a result of tougher economic conditions and increased supply from Australia (up by more than 50% compared to 2022). China's tariff on Australian sheepmeat also dropped to 0% at the beginning of 2023, so NZ no longer enjoys any tariff advantage in the market.

The UK was NZ's 2nd largest market for the year, taking 30,133 tonnes (down 7% from 2022). The value of exports to the UK dropped by 29% to \$291 million. This was mostly due to the impact of high inflation and food prices on consumer spending, but increased supply from Australia likely also had some impact. Australia's FTA with the UK also entered into force in the middle of the year and Australia has benefited from increased sheepmeat access, sending an additional 4,000 tonnes to the UK in 2023.

The US was NZ's 3rd largest market by volume in 2023 (27,567 tonnes), but 2nd largest by value (\$544 million). The volume and value of exports were down by 5% and 8% from record levels in 2022. But the US was still one of our highest value markets in 2023, at \$18.04/kg (FoB), compared to 9.67/kg for overall exports, \$10.55/kg for exports to the UK and \$6.47/kg for exports to China during they year.

Beef exports in 2023

Similar to sheepmeat exports, the volume of beef exports was up 7% in 2023 to 511,680 tonnes, but the value was down 9% to \$4.4 billion from a record level in 2022. This reflected difficult economic conditions and cost of living pressures in key markets, and high levels of exports from other large global suppliers.

There was a significant recovery of beef exports to the US. In 2022, exports to the US dropped to the lowest volume that they have been for more than 20 years, due to increased US domestic production resulting from drought and high feed costs. In 2023, the drought began to ease in some regions, reducing the level of domestic production and increasing the demand for imports. NZ and Australia have been the main beneficiaries of this demand as we both have good quota access (around 213,00 tonnes and 448,000 tonnes respectively). NZ's beef exports to the US grew by 46% to 181,040 tonnes, and the value grew by 28% to \$1.60 billion.

While the volume of exports to China was still high in 2023 (down 6% to 203,509 tonnes), the weak economy, high inventory levels and large imports from Brazil meant that the value of exports dropped 28% to \$1.56 billion. Brazil has relatively limited access to the United States and most of its exports go to China. Brazil accounted for more than 40% of China's beef imports of 2.8 million tonnes in 2023.

One, much smaller, beef market of note in 2023 was the United Kingdom. Following the entry into force of the NZ-UK FTA in mid-2023, New Zealand has gained significantly improved quota access for beef. In 2023, overall beef exports to the UK grew by 83% to 2,421 tonnes (worth \$27 million). Most of this growth was in exports of high value chilled beef, and as a result of this growth over the last 7 months the UK was one of NZ's top 10 markets for chilled beef in 2023, with exports of 884 tonnes worth \$11.8 million.

Fifth quarter exports in 2023

Fifth quarter exports were worth \$2.0 billion in 2023, down 8% from 2022. Exports for most categories declined (or only increased slightly) apart from blood products, which increased by 168% to 283 million.
