	\$4,640 million	7%
<b>Co-products exports</b>	\$2,220 million	11%

## Overview of March 2023 exports

Some key points for the March month exports:

- \* Overall exports for March were worth \$1.1 billion, which was 4% less than in March 2022.
- \* Exports to China were relatively strong for all product and were worth \$440 million, up 22% from March last year.
- \* But exports to the United States were down 13% to \$244 million, with sheepmeat exports down in value by 36% and beef exports down 3%.
- \* The 3rd largest market for the month was the Netherlands with exports worth \$45m, up 11% from last March.
- \* Exports to the UK were down (again) to \$32 million, 50% less than they were last March.
- \* The other big drop was in exports to Japan, down 40% to 30 million, which was a result of a significant drop in the volume and value of beef exports to the market.

While the volume of both sheepmeat and beef exports increased compared to last March (by 16% and 9% respectively), the value of both also decreased, with sheepmeat down 8% to \$448 million and beef down 8% to \$416 million.

In both cases, the March 2022 export volumes were relatively low and the export values relatively high (at a record level in the case of beef).

For sheepmeat, exports this March were slightly below the average for recent March exports and beef exports were slightly above the average for recent March exports.

A positive note is that while the average export values for both sheepmeat and beef have been decreasing into most markets since they peaked in mid-to-late 2022, there was a slight increase in the export values to nearly all the major sheepmeat and beef markets in March compared to February.

For the 1st quarter of the year exports were worth \$2.8 billion, 11% less than in the 1st quarter of 2022, and exports to nearly all of the major markets were down compared to the 1st quarter of last year.

The value of sheepmeat exports was down 15% to \$1.1 billion and beef was also down 15% to \$1.1 billion. However, co-products bucked the trend with exports up 8% for the quarter to \$540 million.

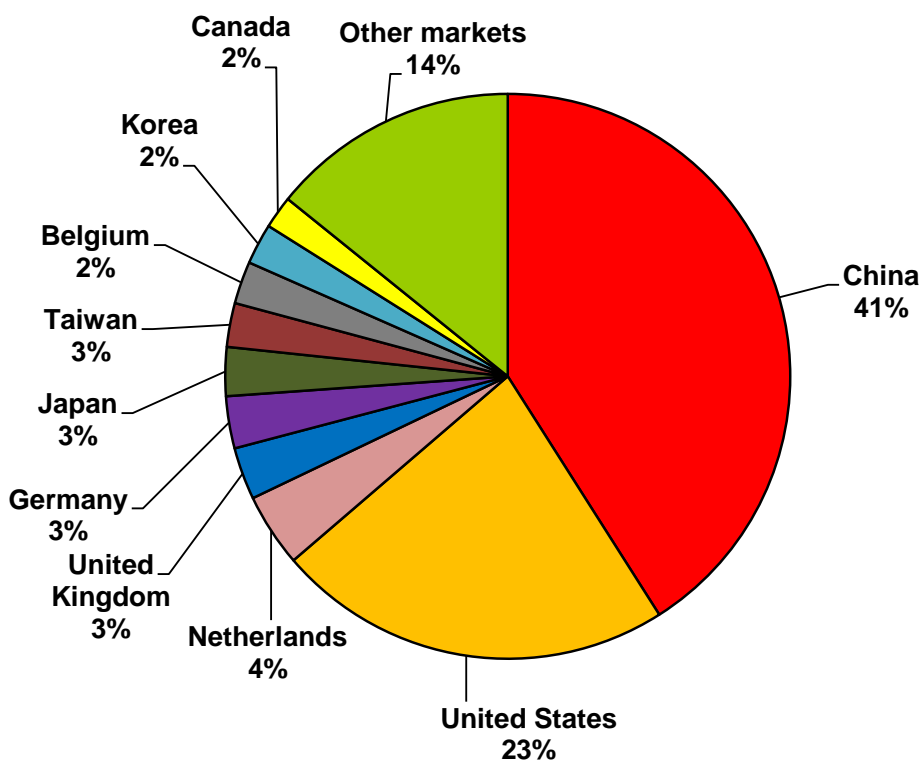

The tough economic conditions in some of our major markets have had an impact on value of exports in the 1st quarter of this year, particularly compared to the high export values of last year, but export values appear to have stabilised somewhat in March.

For the 12 months ended 31 March 2023, the lower values of the last few months have almost cancelled out the higher values in the middle of last year and overall exports for the 12 month period are similar to the previously March year.
