Statistics New Zealand data is provisional for the three most recently released months

### Notes

Volume.	Shipped weight
Value.	Free on Board (FOB) - the current market value of goods in the country of origin, including all costs necessary to get them on board the ship.

<b>Summary of red meat and co-product exports, May 2024</b>		Change from May 2023
<b>Overall exports</b>	\$1,109 million	3%
<b>Top five overall markets</b>	United States - \$358 million	28%
	China - \$232 million	-42%
	Japan - \$72 million	96%
	United Kingdom - \$62 million	51%
	Netherlands - \$46 million	25%
<b>Sheepmeat exports</b>	39,232 tonnes	-1%
	\$387 million	-5%
<b>Beef exports</b>	55,498 tonnes	5%
	\$524 million	9%
<b>Fifth quarter exports</b>	\$198 million	6%

## Overview of May 2024 exports

### Overall exports

- \* Total exports were worth \$1.1 billion for the month, 3% up on May last year.
- \* Overall, the value of exports to nearly all markets increased compared to May last year – except China.
- \* The US was the largest market again this month, with exports worth \$358m (up 28% on last May). China was the 2<sup>nd</sup> largest with exports of \$232m, but they were down 42% compared to last May. The next two largest markets were Japan at \$72m (up 96%) and the UK at \$62m (up 51%).

### Beef

- \* The growth compared to last May was mostly driven by an increase in beef exports, with the volume up 5% to 55,498 tonnes and the value up 9% to \$524m. The US was the largest market for the month, with the volume up 17% to 24,929 tonnes and an even larger increase in the value, up 31% to \$261m.
- \* This wasn't quite a record monthly volume, which was in March 2015 when the US was undergoing its last major rebuild and NZ processing volumes were high due to drought, but it was a record monthly value for beef exports to the US. The FoB value of beef exports to the US has been steadily increasing this year, from \$8.33/kg in January to \$10.48/kg in May.
- \* The US rebuild is probably not fully underway yet, with US domestic beef production slightly higher in May than it was a year ago. However, domestic supply in North America is continuing to tighten with exports to Canada also continuing to grow, up 177% to 2,184 tonnes and 197% to \$20m.
- \* The other notable increase was in exports to Japan, with a record monthly volume of 5,533 tonnes (up 164% from last May) and value of \$55m (up 151%). Japan continues to see high tourism numbers with inbound visitors again topping three million in April, which is likely to be helping the demand for beef.
- \* The major exception was China, with the volume down 33% to 14,387 tonnes and the value down 45% to \$98m. *(My understanding is that China is still importing large volumes of beef from South America, but I will have a look at the May import data)*
- \* With the NZ-EU FTA entering into force at the beginning of the month, beef exports to the EU of 712 tonnes worth \$13.8m were higher than they have been in recent months, but it wasn't a dramatic increase and there have been previous months where the volume and value of beef exports to the EU has been higher.

### Sheepmeat

- \* Sheepmeat exports were down slightly on last May, with the volume down 1% to 39,232 tonnes and the value down 5% to \$387m.
- \* This was mainly due to a decline in exports to China, down 32% by volume to 15,499 tonnes and 49% by value to \$84m. This decline was likely due to weak demand rather than an increase in supply from other exporters, as Australian sheepmeat exports to China have also been down over the last three months compared to last year.
- \* While exports to China were down, exports to most other major markets were up compared to last May. Demand for all meat remains strong in the US and sheepmeat exports were up 66% by volume to 3,568 tonnes and 31% by value to \$66m.
- \* Exports to the UK are continuing to recover, up 40% by volume to 5,392 tonnes and 34% by value to \$51m.
- \* Exports to the EU were also strong at 7,085 tonnes worth \$113m, up by 23% and 15% respectively from last May.

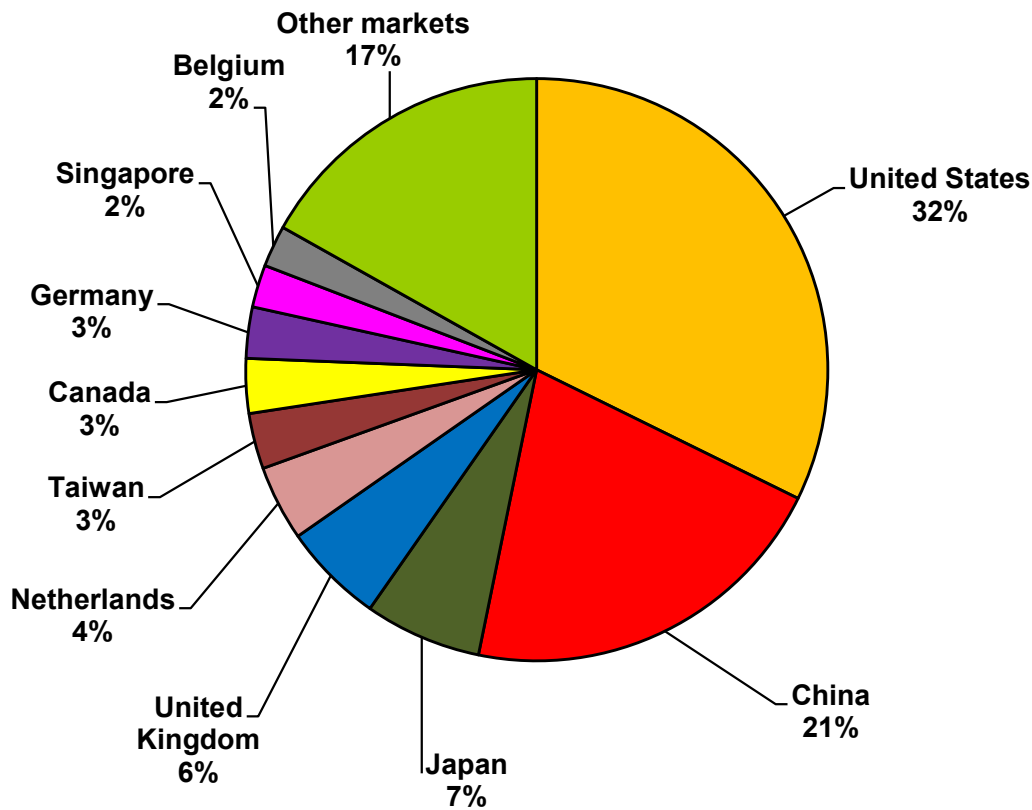

### Fifth quarter

- \* Fifth quarter exports were up by 6% to \$198m for the month.
- \* The most significant change from last May was a 174% increase in the value of tallow exports to \$30m. Just under 70% of these exports were to Singapore, where tallow is used as an ingredient in bio-fuel manufacturing. These tallow exports also pushed Singapore up into the top 10 overall markets for the month.
