Highlights for February 2022 exports

February exports followed a similar pattern to January.

Export volumes down for sheepmeat were down 11% compared to last February, but the value was up 13% to \$475m

Export volumes were also down for beef (-7%), but the value was up again by 34% to \$460m.

It was another good month for co-products which were worth \$172m (up 16% from last February).

The ongoing strong prices meant that overall exports were worth \$1.1 billion for the month, with increases to all the major markets:

- * China was up 4% to \$406m
- * United States up 34% to \$238m
- * United Kingdom up 28% to \$66m

However, there was another drop in the volume of chilled sheepmeat exports, down 18% compared to last February.

The largest drop in chilled exports was to the UK, which were down 52%, which is indicative of the ongoing supply chain challenges.

Beef exports still seem to be holding up better than sheepmeat, with the volume of chilled beef exports up slightly (1%) compared to last February.

There was a drop in the volume of beef exports to China in February (-10% to 17,938 tonnes), but last February was a record month so the volume is still historically very high.

While the impact of labour shortages in the industry is not yet showing up in the headline export data, they are starting to affect exports of specific products.

For example, while offal prices are still high the volume of offals exported in February was down around 35% compared to the average volume for exports in February over the last five years, indicating that there aren't the staff available to process every part of the carcass.
