## Overview of March 2022 exports

Overall it was a positive month, with exports with total exports worth \$1.15 billion, up 11% from last March. So it was another month where the value of exports was over \$1 billion.

The value of exports to nearly all the major markets increased compared to last March, with exports to the US up 48% to \$288m, to the UK up 22% to \$65m and to Japan up 18% to \$50m. March also saw record a monthly volume (4,295 tonnes) and value (\$83.4m) of sheepmeat exports to the US.

While the value of overall sheepmeat exports was largely unchanged at \$500m for the month the value of beef exports was up 27% to \$470m, although the per-kilo value of beef exports was down slightly from the record levels in February.

However, the volume of both sheepmeat and beef exports were both down compared to last March, with sheepmeat volume down 25% to 41,541 tonnes and beef down 8% to 46,176.

This is likely due in part to the Covid-related processing constraints, as cattle slaughter is down 11% in the 1<sup>st</sup> quarter compared to the 1<sup>st</sup> quarter of last year and sheep slaughter down 16%

The major drop was in the volume of exports to China. Sheepmeat volume was down 46% and beef volume 7%. For sheepmeat the big decline is partly because last March was a record month, but it was still the lowest March volume since 2018. Beef was still the 3<sup>rd</sup> highest March volume.

The slow-down in meat exports to China wasn't just affecting New Zealand, as China Customs stats shows that there was a drop in volume of all meat imports into China in March, and is probably due to the impact of lock-downs and port disruptions.

This meant that China was the only major market that saw drop in the value of exports compared to last March, down 17% to \$384m

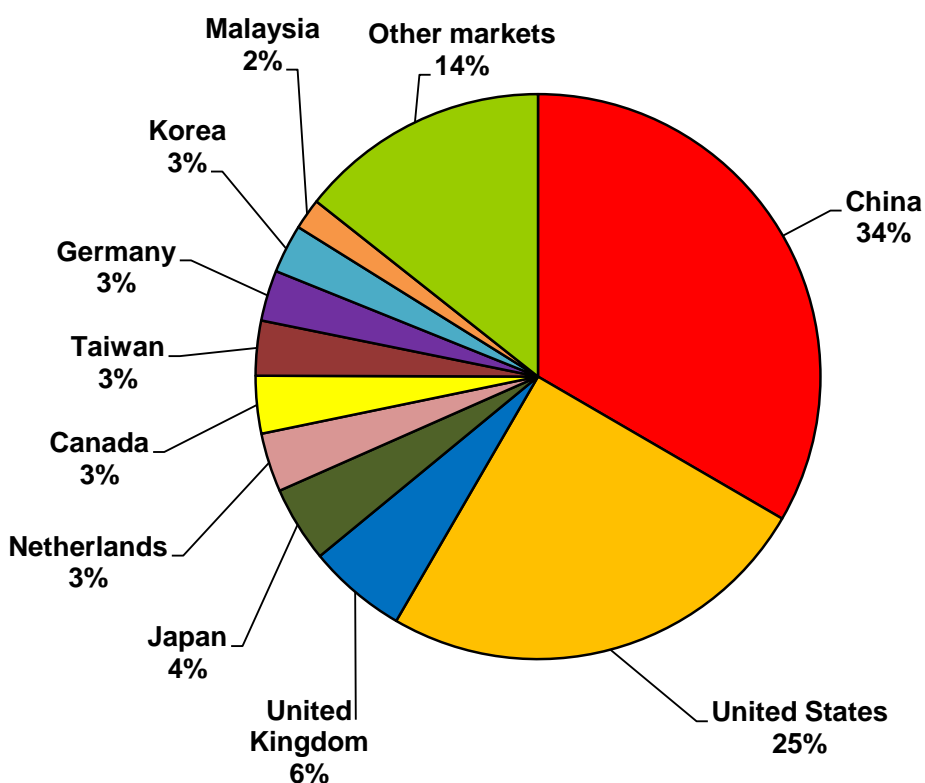

Another point of note for the month was that there was another big drop in chilled exports to the UK, which were down 80% to 433 tonnes, highlighting the ongoing logistics issues.

For the quarter, overall exports were \$3.1 billion up 17% compared to the 1<sup>st</sup> quarter of 2021. Similar to the exports to March there was an increase exports to most markets except China, which was down 1% to \$1.2 billion for the quarter.
