## Overview of May 2022 exports

### New tables

Four new tables have been added to the report:

- \* Overall monthly sheepmeat exports by volume, January 2016 - May 2022
- \* Overall monthly sheepmeat exports by value, January 2016 - May 2022
- \* Overall monthly beef exports by volume, January 2016 - May 2022
- \* Overall monthly beef exports by value, January 2016 - May 2022

### Highlights

It was another record month with exports worth \$1.1 million, up 28% from May last year, and record FoB values for both sheepmeat and beef.

May continued the trend we have seen this year of average or low monthly export volumes and very high export values.

For sheepmeat, the export volume of 35,780 tonnes for the month was down 6% compared to last May, but the value was up 23% to \$456m.

While sheepmeat exports to China were down compared to last May, exports to all other markets increased, in particular the United Kingdom. The 5,376 tonnes exported to the UK in May was the largest monthly volume since March 2020. However, due to the ongoing supply chain issues, only 8% of exports to the UK this May were chilled, compared to 40% back in March 2020.

While exports to China were down, prices remained strong and the overall FoB value for sheepmeat exports was up to \$12.74/kg, a record level.

For beef, the export volume of 46,412 tonnes was up 1% compared to last May, but the value was up 34% to \$484m.

Beef exports to China rebounded, up 27% compared to last May, and the 20,794 tonnes was the largest monthly volume so far this year. The value of these exports was up 72% to \$207m.

Exports to the other major market, the United States, were down 30% compared to last May. This continues the trend of lower export volumes to the United States so far this year, where increased domestic production as a result of drought is having an impact on the demand for imported beef.

However, prices for beef remained strong, and the value of exports to the US only dropped by 5%, to \$125m, compared to last May

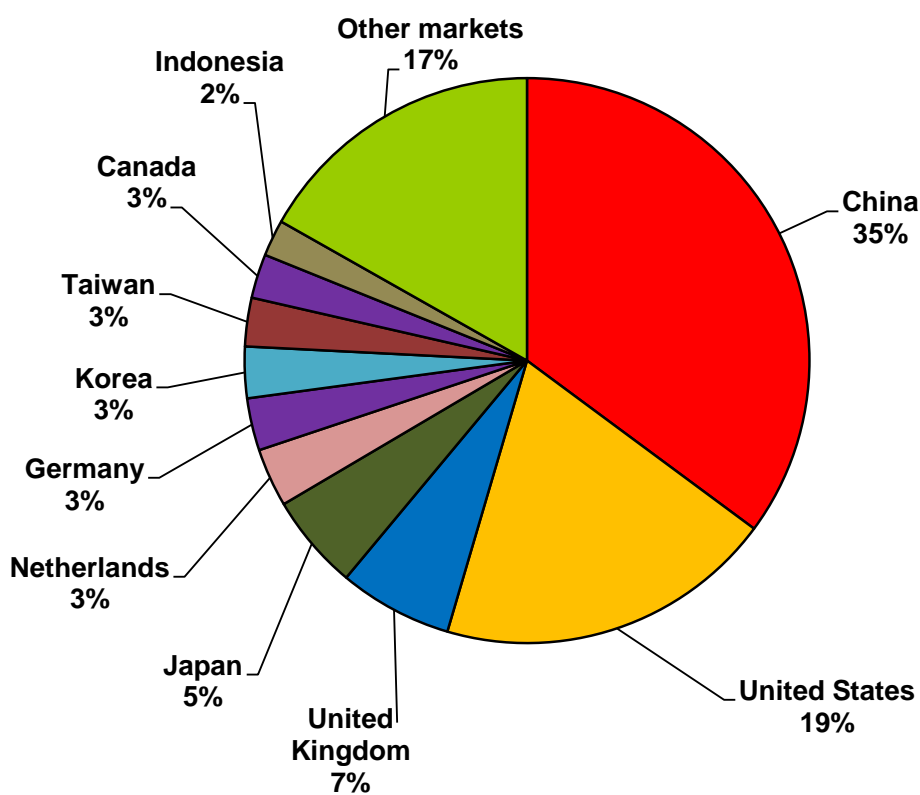

Beef prices in all the other major markets remained very strong, and the average FoB value increased to \$10.43/kg, a record level.

It was another strong month for co-products with exports worth \$189m, up 26% compared to last May.
