Beef exports	486,623 tonnes	-2%
	\$4,279 million	-2%
Fifth quarter exports	\$1,897 million	-9%

Overview of September 2024 exports

It was another subdued month, with overall exports down 8% from last September to \$564 million.

The US was again the largest market for the month, but exports were actually down 5% to \$143 million. While the value of beef imports to the US increased by 15% (to \$90m), sheepmeat exports were down 2% to (\$37m). There was also a 52% drop in the value of fifth quarter exports to the US (to \$16m). This was largely due to tallow exports dropping by \$10m, which continued the trend in recent months of tallow exports shifting to Singapore.

China was still the 2nd largest market, with exports of \$106m, but this was 41% less than last September with exports of all categories down.

On the other hand, exports to Canada increased by 71% to \$40m, exports to the Netherlands were up 48% to \$30m and exports to the UK were up 51% to \$25m. In all three of these markets there was growth in both sheepmeat and beef exports compared to last September.

The most noticeable trend for the month, and the 3rd quarter, was the drop in the volume of exports compared to last year.

For the month, sheepmeat exports were down 16% to 16,238 tonnes compared to last September and were down 14% for the quarter to 58,685 tonnes. For beef, September exports were down 9% to 28,149 tonnes and exports for the quarter were down 19% to 94,807 tonnes.

This appears to be largely due to a drop in production over the recent months rather than a drop in demand. In the 1st five months of the year (Jan-May) beef production was 4% up on the same period last year and sheepmeat production was up 6%.

However, over the following 3 months (Jun-Aug) beef and sheepmeat production were both down 24% compared to the same period last year. So, there has been less meat produced and available for export.

Export values have dropped but not as much as the volume. In September, sheepmeat exports were down 7% to \$183m and for the quarter were down 10% to \$604m. Beef exports were only down 2% for September to \$252m and were down 12% for the quarter to \$868m.

So, it appears that in general there is still demand (except perhaps in China) but supplies have been constrained in recent months.

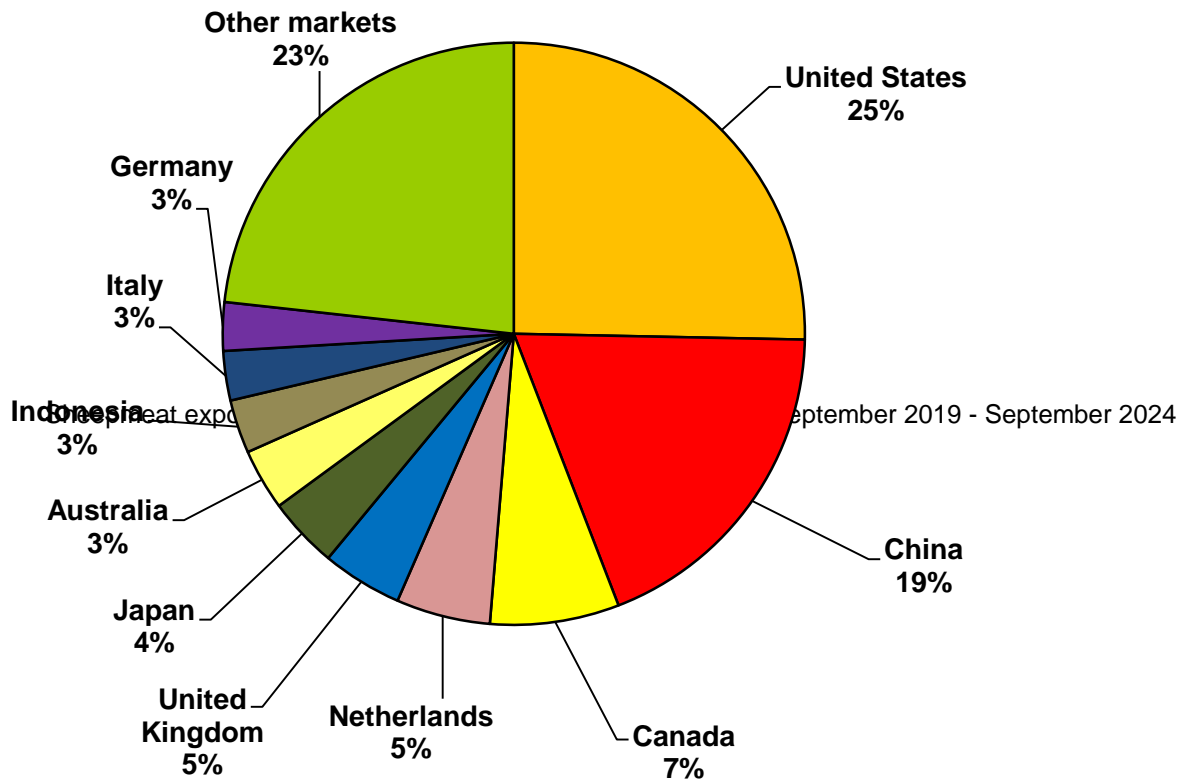

A good example is beef exports to the US. In September, the volume of exports to the US was down 4% to 8,244 tonnes but the value increased by 15% to \$90m, and the average value of exports grew from \$9.14/kg to \$10.92/kg.

For sheepmeat, the volume of sheepmeat exports to the UK increased by 36% to 1,806 tonnes but the value was up by 46% to \$18m. Similarly, sheepmeat exports to the EU were up 12% by volume to 3,086 tonnes but the value was up 23% to \$55m.

Top 10 overall red meat and fifth quarter markets by value, September 2024
