Beef exports	481,657 tonnes \$4,389 million	-5% 0%
Fifth quarter exports	\$1,867 million	-3%

Overview of December 2024 exports

Exports for the month

2024 ended on a positive note, with the total value of exports increasing 17% from last December to \$1.04 billion. The only other month in 2024 when exports were above \$1 billion was in May (\$1.11 billion).

Further recovery in the value of exports to China meant that exports were unchanged from last December at \$313m, making it the largest market for the month. There was growth in the value of exports to other major markets including the US (up 38% to \$310m), the UK (up 53% to \$64m), and Canada (up 116% to \$46m).

The volume of sheepmeat exports was down 3% from last December to 37,215 tonnes, but the value was up 22% to \$378m. There was an increase in the value of exports to most major markets, in particular China where the volume was down 7% to 20,364 tonnes but the value increased 21% to \$135m.

The volume of beef exports was also down slightly, by 1% to 50,098 tonnes, but the value also increased by 22% to \$511m. The standout market was North America, with exports to the US up 13% by volume to 20,600 tonnes and 48% by value to \$232m, and exports to Canada up 167% by volume to 3,141 tonnes and 201% by value to \$33m.

Fifth quarter exports were down by 7% to \$155m for the month.

Exports for the year

Despite the recovery in recent months, the challenging conditions earlier in the year in some markets meant that overall exports for the year were down 3% to \$9.86 billion.

Ongoing demand for meat in the US meant that it was the largest market for the year with exports of \$2.77 billion, up 12% on 2023. China was still the 2nd largest market, but exports were down 31% to \$2.49 billion. Exports to the UK recovered by 46% to \$525m, and there was growth in exports to Japan, up 23% to \$475m and to Canada, up 44% to \$424m.

Overall sheepmeat exports for the year were down 3% by volume and value to 373,682 tonnes and \$3.61 billion, largely reflecting the difficult conditions in China.

While exports to China were down for the year, exports to the US reached a record volume and value of 34,588 tonnes worth \$625m.

In other key markets, exports to the UK increased by 41% by volume and 44% by value, to 42,183 tonnes and \$417m. This was the largest volume of exports to the UK since 2018 and the highest value since 2020. There was also growth in exports to the EU, up 11% to 59,268 tonnes and 8% by value to \$927m.

For beef, the overall export volume was down 5% to 481,657 tonnes, but the value was unchanged at \$4.39 billion.

While exports to China were down for the year, there was good growth in exports to the US, up 2% by volume to 183,084 tonnes and 16% by value to \$1.85 billion, Japan, up 33% by volume to 32,590 tonnes and 41% by value to \$324m, and Canada, up 59% by volume to 28,364 tonnes and 70% by value to \$259m.

The value of the NZ-UK FTA was again demonstrated, with beef exports to the UK of 4,417 tonnes worth \$57m, making it the 9th largest beef market by volume and 8th largest by value for the year.

While frozen sheepmeat and beef exports were down compared to 2023, there was growth in chilled exports. Chilled sheepmeat exports of 38,249 tonnes were 7% up on the historically low level of 2023, with the value also increasing by 7% to \$664m.

The volume of chilled beef exports increased by 12% to 37,763 tonnes and the value grew 20% to \$641m.

Fifth quarter exports were also down 3% for the year, to \$1.87 billion, and the three largest categories for the year were edible offals (\$345m), Casings and tripe (\$328m) and Blood products (\$271m).
