## Overview of April 2025 exports

### Note

A reminder that the top 10 sheepmeat and beef tables now include the EU as a single market and there are additional tables showing sheepmeat and beef exports to EU markets. The fifth quarter table still shows individual EU countries as there are distinct markets in the EU for different fifth quarter products (e.g. Italy for hides, and Denmark for blood products).

April was another good month, with overall exports worth \$1.21 billion. This was slightly down on the record exports in March, but still 34% higher than last April.

The US was the largest market for the month with exports worth \$344m, up 39% from last April, followed by China (\$253m, up 9%), the UK (\$81m, up 56%), the Netherlands (\$60m, up 96%), and Germany (\$54m, up 160%).

The only major market where there was a decline in exports compared to last April was Japan, down 4% to \$50m, which was due to a drop in beef and beef offal exports.

For sheepmeat, the theme continues to be recovery in exports to China and strong demand in the EU.

Overall sheepmeat exports in April were 41,843 tonnes worth \$517m, an increase of 13% by volume and 51% by value compared to last April.

The volume of exports to China was up 6% to 17,461 tonnes and the value was up 34% to \$122m. There was an even larger increase to the EU, with the volume up 53% to 8,689 tonnes and the value up 93% to \$167m, which was a new record for a single month.

Sheepmeat exports to the US in April were also up 11% by volume to 3,293 tonnes and the value was up 22% to \$67m.

The one major market where there was a small drop in volume was the UK, where exports were down 3% to 4,589 tonnes. However, the value of exports to the UK was up 51% to \$64m.

The volume of overall beef exports was down 3% from last April to 42,421 tonnes, but the value was up 21% to \$473m.

The US was once again the largest market for the month with exports of 18,107 tonnes worth \$228m. This was an 10% increase by volume and 38% increase by value compared to last April.

While the volume of exports to the US was 5,000 tonnes lower than in March, it is not uncommon for there to be a drop in the volume of exports from March to April so this was probably not due to the additional tariffs.

Exports to China were down again, 31% by volume to 9,763 tonnes and 27% by value to \$71m, but exports to Canada were up 40% by volume to 2,865 tonnes and 77% by value to \$33m.

There was a 26% drop in the volume of exports to Japan, down to 2,832 tonnes. But with the demand in North America generally keeping prices up, the value of exports to Japan only dropped 5% to \$34m.

It was also a good month for fifth quarter exports, with the value of all categories increasing from last April, and overall fifth quarter exports up 29% to \$221m.
